Augmented Reality Evangelist

Leader: VENISE Team

Professor

GUANGZHOU GREATER BAY AREA VIRTUAL REALITY RESEARCH INSTITUTE

MY PAST AND UPCOMING 22 YEARS WITH AUGMENTED REALITY

Keynote at MediaFutures Annual Meeting

BURNAR: FEEL THE HEAT

Matt Swoboda, Thanh Nguyen, Ulrich Eck, Gerhard Reitmayr, Stefan Hauswiesner, Rene Ranftl, and Christian Sandor. Demo at *IEEE International Symposium on Mixed and Augmented Reality*, Basel, Switzerland, October 2011. **Best Demo Award**

BURNAR: INVOLUNTARY HEAT SENSATIONS IN AR

Peter Weir, Christian Sandor, Matt Swoboda, Thanh Nguyen, Ulrich Eck, Gerhard Reitmayr, and Arindam Dey. *Proceedings of the IEEE Virtual Reality Conference*, pages 43–46, Orlando, FL, USA, March 2013.

MY BIO IN A NUTSHELL: AR AROUND THE WORLD

Born and raised in Munich (Germany)

TU Munich: Master (2001) & PhD (2005)

Directed Labs

Australia: Magic Vision Lab (2010-2014)

Japan: Interactive Media Design Lab
(2014-2018; co-director)

Hong Kong:

Augmented Reality Lab (2021)

Extended Reality Lab (2019-2020; co-
director)

France: VENISE (since 2021)

THE VENISE TEAM

RECENT US INVESTMENTS INTO AR & VR

3/2014: Facebook buys Oculus

2 Billion USD

10/2014: Google and others invest into Magic Leap

542 Million USD

1/2015: Microsoft releases Hololens

1 Billion USD

3/2018: More investments into Magic Leap; total now

2.3 Billion USD

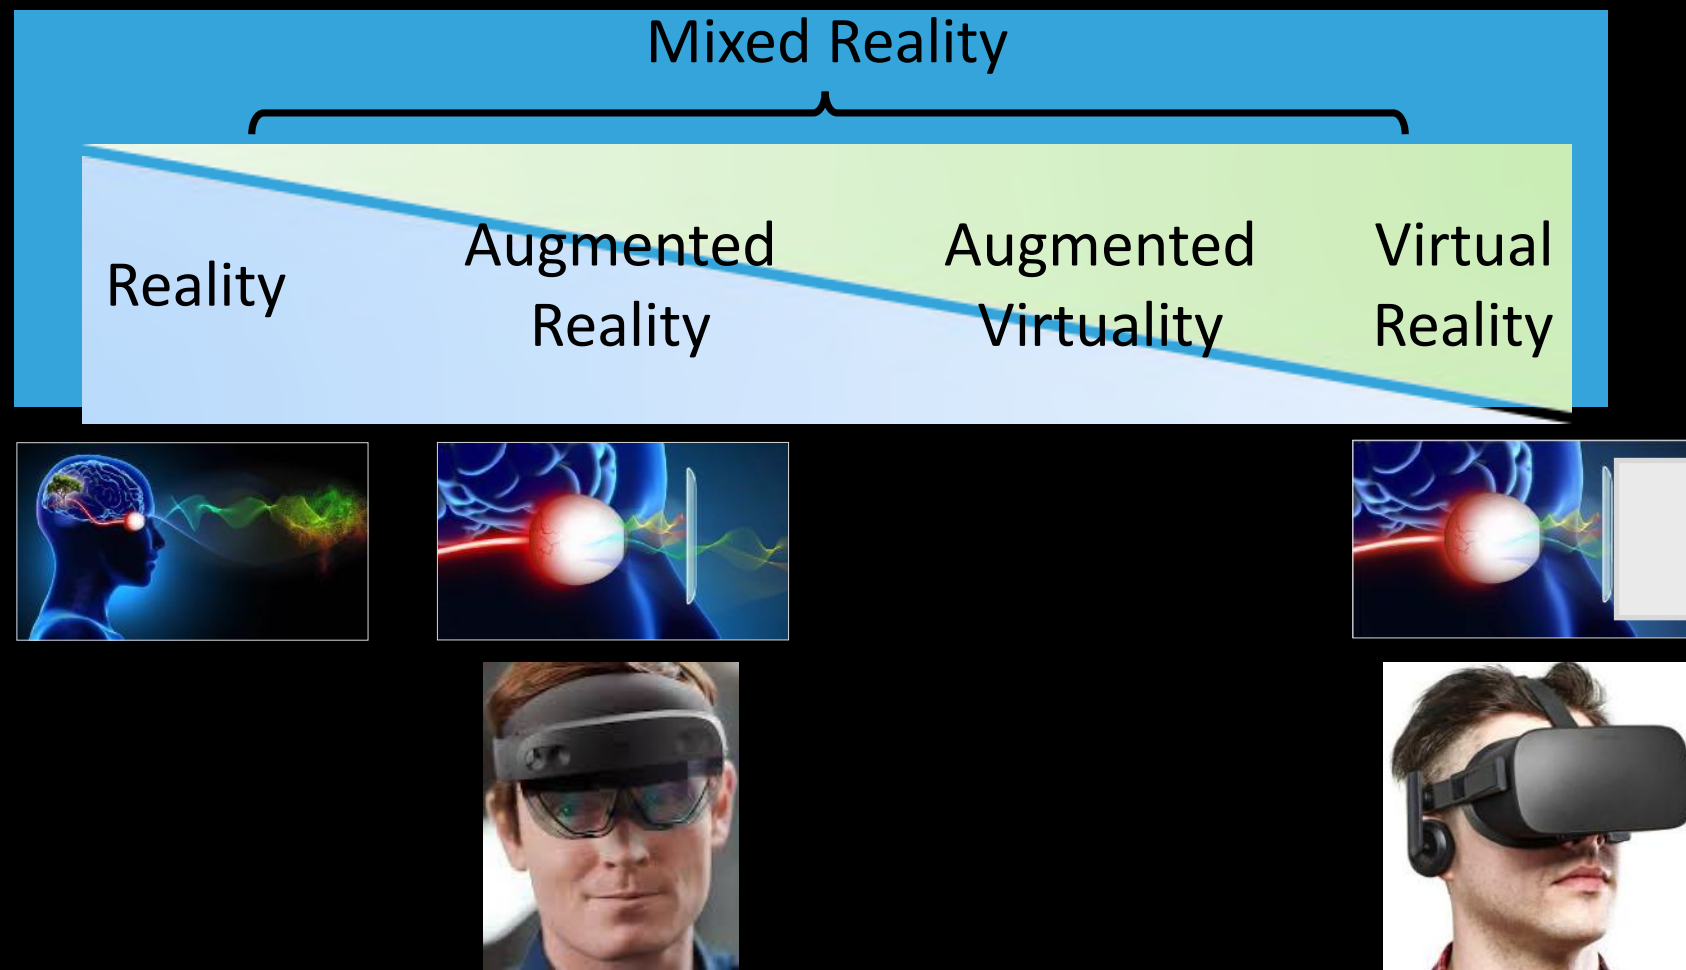

10/2021: Facebook announces Metaverse initiative

>10 Billion USD per year

20% of Facebook employees involved

MIXED REALITY (MR)

Paul Milgram and Fumio Kishino. A Taxonomy of Mixed Reality Visual Displays. *IEICE Transactions on Information Systems*, E77-D(12):1321–1329, December 1994

EXTENDED REALITY (XR) = MR + VR

Paul Milgram and Fumio Kishino. A Taxonomy of Mixed Reality Visual Displays. *IEICE Transactions on Information Systems*, E77-D(12):1321–1329, December 1994

MY GUIDING RESEARCH QUESTIONS

1. How to create an AR display that can display *virtual objects that are indistinguishable from real objects*?
2. How does the human Eye-Brain system react to AR?
3. Aftereffects of using AR?

RELEVANT RESEARCH AREAS FOR ADDRESSING THESE QUESTIONS

Human Perception

Psychology, Neuroscience

Technology

Computer Graphics, Computer Vision, Optics, Embedded Computing, Deep Learning, Software Engineering

Applications

UX Design

EDGE-BASED X-RAY

Benjamin Avery, Christian Sandor, Bruce H. Thomas. Improving Spatial Perception for Augmented Reality X-Ray Vision. In *Proceedings of the IEEE Virtual Reality Conference*, pages 79–82. IEEE, March 2009. Lafayette, Louisiana, USA.

AR X-RAY FOR GOOGLE GLASS

Google Faculty Award (2014)

FINAL DEMO (4/2015)

CURRENT WORK: MEDICAL APPLICATIONS

Rehabilitation & Sports Medicine Frozen Shoulder

SHOULDER - 26
Range of Motion Exercises:
Pendulum (Circular)

Let arm move in a circle clockwise, then counter-clockwise, by rocking body weight in a circular pattern.

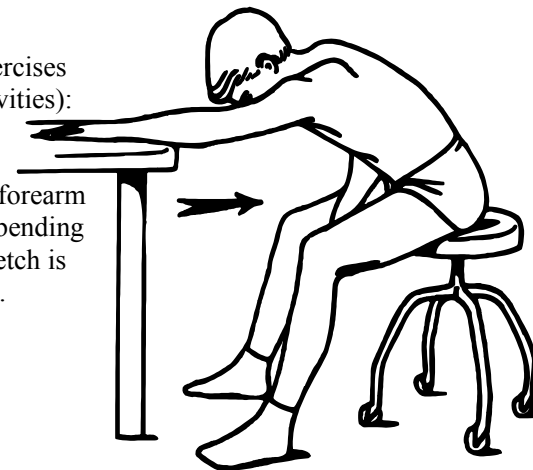

Repeat 10 times.
Do 3-5 sessions per day.

SHOULDER - 7
Range of Motion Exercises (Self-Stretching Activities):
Flexion

Sitting upright, slide forearm forward along table, bending from waist until a stretch is felt. Hold 30 seconds.

Repeat 1-4 times
Do 1 session per day.

SHOULDER - 11
Range of Motion Exercises (Self-Stretching Activities):
External Rotation (alternate)

Keep palm of hand against door frame, and elbow bent at 90°. Turn body from fixed hand until a stretch is felt. Hold 30 seconds.

Repeat 1-4 times
Do 1 session per day.

SHOULDER - 9
Range of Motion Exercises (Self-Stretching Activities):
Abduction

With arm resting on table, palm up, bring head down toward arm and simultaneously move trunk away from table. Hold 30 seconds.

Repeat 1-4 times Do 1 session per day.

SHOULDER - 73
Towel Stretch for Internal Rotation

Pull involved arm up behind back by pulling towel upward with other arm. Hold 30 seconds.

Repeat 1-4 times
Do 1 session per day.

SCAP SETS

Pull your shoulders back, pinching the shoulder blades together. Do not let the shoulders come forward. Hold 5-10 seconds.

Repeat 10 times
Do 1 session per day.

Yōkai (妖怪) are supernatural monsters, spirits, and demons that range from the malevolent to the mischievous and occasionally bring good fortune; in Japanese folklore, they go back as far as AD 700. In this unique Augmented Reality experience we enable multiple users to encounter them together in a unique story, situated in Shunkoin, an ancient temple in Kyoto.

Left: Katsushika Hokusai (葛飾 北斎). Paper lantern ghost (提灯お化け), 1830

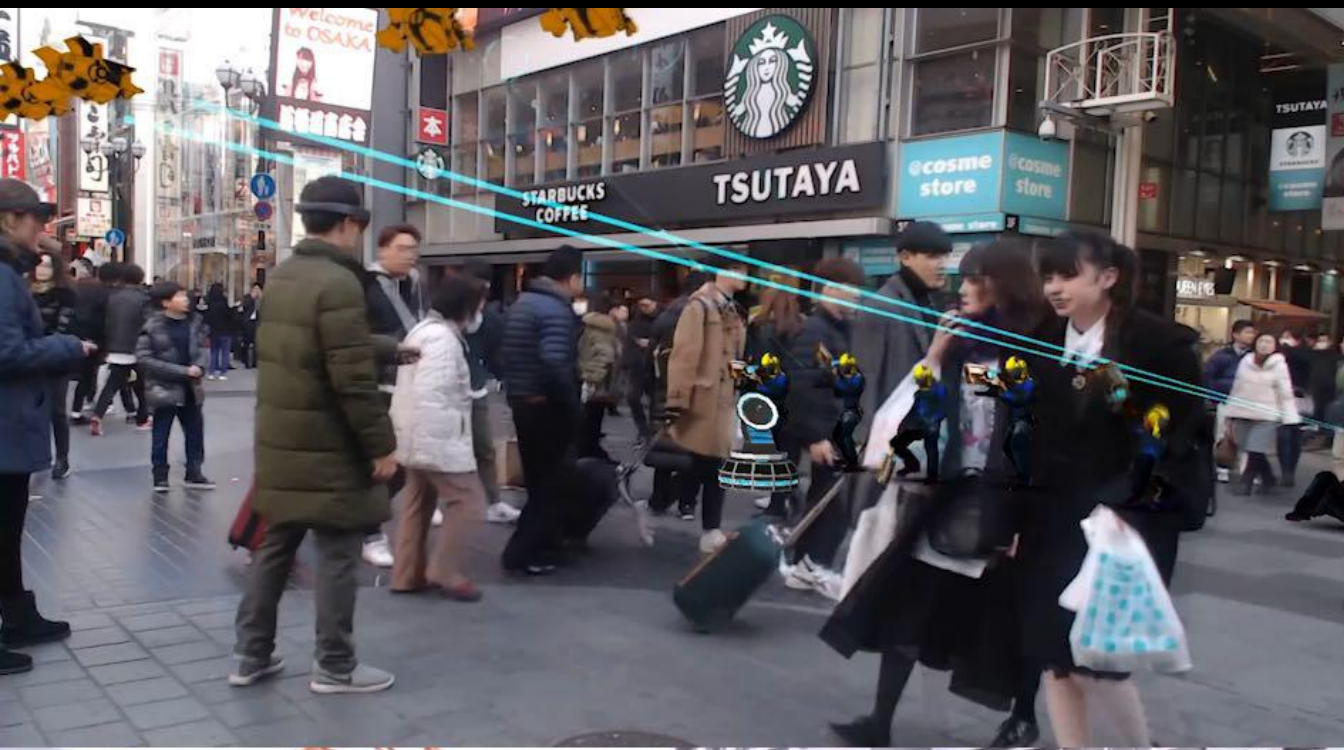

Right: Shunkoin temple (春光院), Kyoto.

SUMMARY: 22 YEARS OF AR RESEARCH

Application domains

Consumer, medical

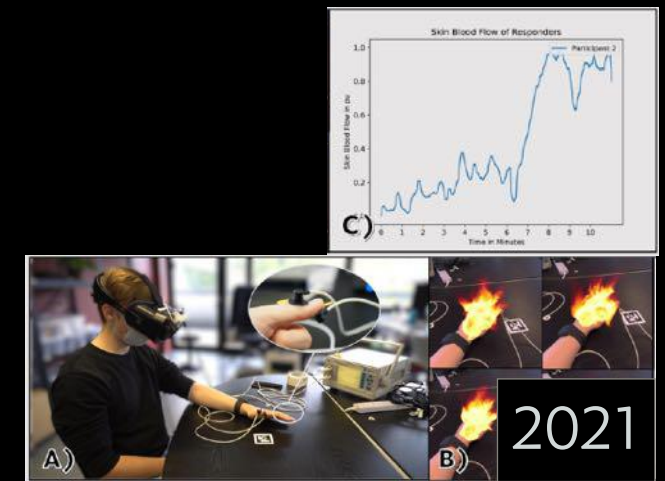

(Automotive, industrial, military)

Fundamental science

Perception

Technology

Overarching question: Content creation

e.g. Situated Storytelling & Games

MY NEXT 22 YEARS OF AR RESEARCH

INCREDIBLE CHALLENGES

Technology

1. How to create a head-worn light field display?
2. How to localize the display in space?

Content production

INCREDIBLE CHALLENGES

Technology

1. How to create a head-worn light field display?
2. How to localize the display in space?

Content creation

MAJOR BREAKTHROUGHS: LOCALIZATION FOR AR

[1996] Jun Rekimoto: Cybercode

First AR marker tracker

[2011] Richard Newcombe:
KinectFusion

First volumetric capturing system
suitable for AR

[1999] Hirokazu Kato: ARToolkit

Open source Cybercode

[2015] Georg Klein: Hololens

First convincing optical see-
through AR HMD

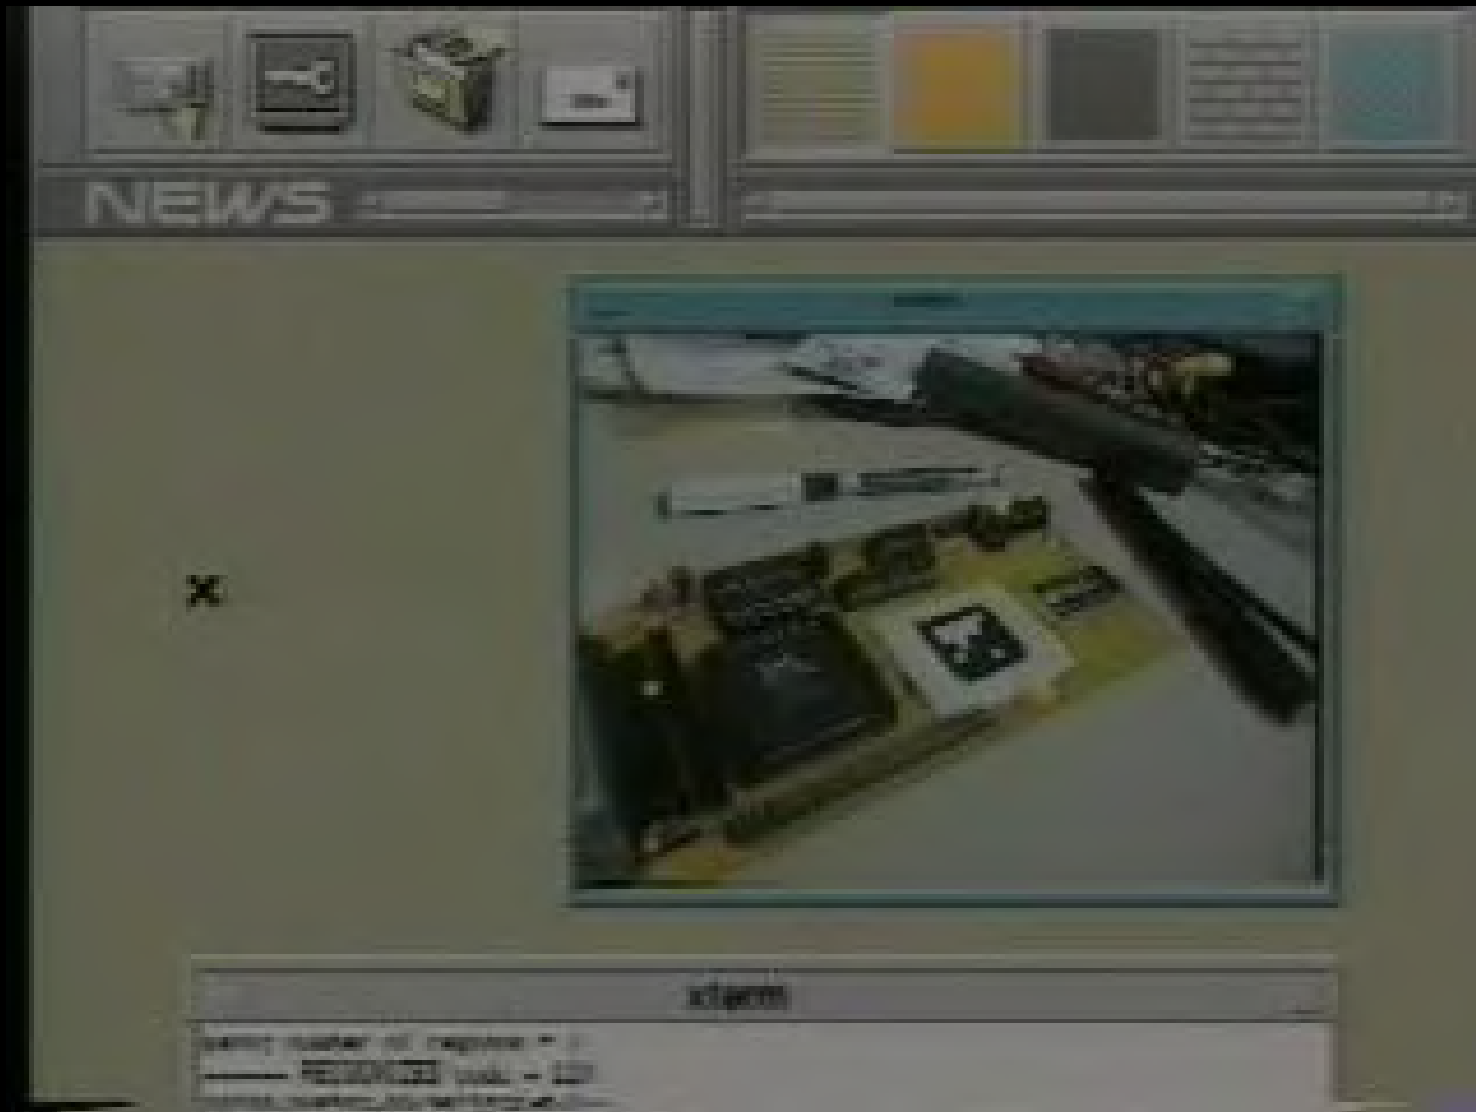

[2007] Georg Klein: PTAM

First SLAM system suitable for
AR

<10 ms motion-to-photon
latency

jitter < 1mm @ 1m distance

CYBERCODE

Jun Rekimoto and Yuji Ayatsuka. CyberCode: Designing Augmented Reality Environments with Visual Tags. In *Proceedings of DARE: Designing augmented reality environments*, pages 1-10, 2000

PTAM

Georg Klein and David Murray. Parallel Tracking and Mapping for Small AR Workspaces. In *Proceedings of the IEEE and ACM International Symposium on Mixed and Augmented Reality*, pages 225-234, 2007.

KINECTFUSION

SIGGRAPH Talks 2011

KinectFusion:

**Real-Time Dynamic 3D Surface
Reconstruction and Interaction**

**Shahram Izadi 1, Richard Newcombe 2, David Kim 1,3, Otmar Hilliges 1,
David Molyneaux 1,4, Pushmeet Kohli 1, Jamie Shotton 1,
Steve Hodges 1, Dustin Freeman 5, Andrew Davison 2, Andrew Fitzgibbon 1**

MAJOR BREAKTHROUGHS: LOCALIZATION FOR AR

[1996] Jun Rekimoto: Cybercode

First AR marker tracker

[2011] Richard Newcombe:
KinectFusion

First volumetric capturing system
suitable for AR

[1999] Hirokazu Kato: ARToolkit

Open source Cybercode

[2015] Georg Klein: Hololens

First convincing optical see-
through AR HMD

[2007] Georg Klein: PTAM

First SLAM system suitable for
AR

<10 ms motion-to-photon
latency

jitter < 1mm @ 1m distance

SO, WHAT'S MISSING?

anywhere!

SO, WHAT'S MISSING? ABSOLUTE POSITIONING

[1996] Jun Rekimoto: Cybercode
First AR marker tracker

We can't stick markers all over the world

[1999] Hirokazu Kato: ARToolkit
Open source Cybercode

[2007] Georg Klein: PTAM
First SLAM system suitable for
AR

[2011] Richard Newcombe:
KinectFusion

First volumetric capturing system
suitable for AR

only relative positioning

[2015] Georg Klein: Hololens

First convincing optical see-
through AR HMD

<10 ms motion-to-photon
latency

jitter < **1mm** @ 1m distance

very hard requirement (forget GPS!)

ABSOLUTE POSITIONING

Definition:

Determination of the 6 degrees of freedom of an object in the world
(rotation & translation)

Desirable properties of an implementation:

instant-on

minimal environmental preparation effort

high accuracy (0.1 mrad)

Other fields have different names for the same problem:

Kidnapped robot problem (Robotics)

Relocalization (Computer Vision)

IN 2015, WE UNSUCCESSFULLY TRIED POSENET

(b) Relocalization under difficult dusk and night lighting conditions. In the dusk sequences, the landmark is silhouetted against the backdrop however again the convnet seems to recognize the contours and estimate pose.

Alex Kendall, Matthew Grimes, and Roberto Cipolla. PoseNet: A Convolutional Network for Real-Time 6-DOF Camera Relocalization. <http://arxiv.org/abs/1505.07427>, 2015.

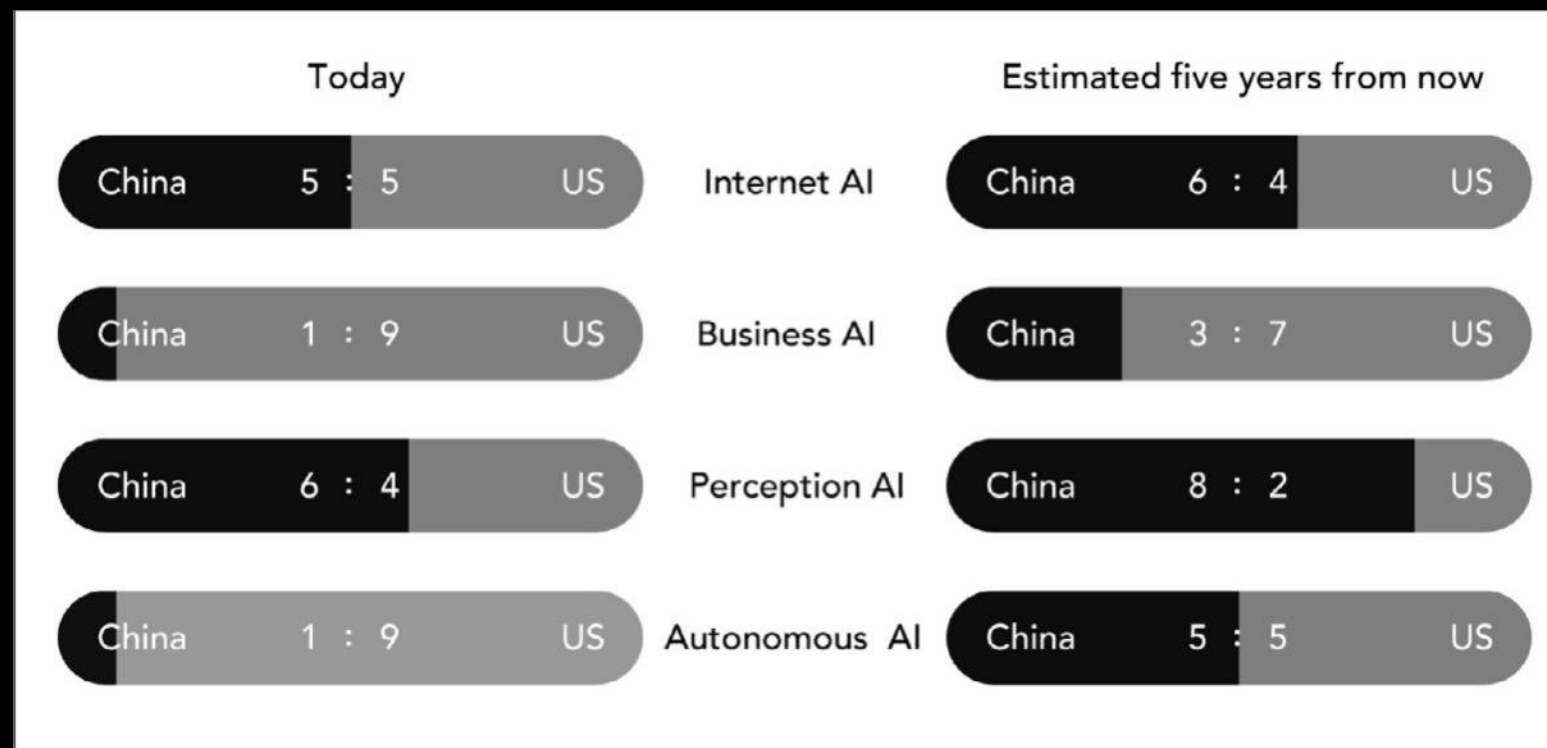

IN 2020, I SAW A WORKING SOLUTION (!)

Visit to one of the biggest Chinese IT companies

They had a demo of a working solution to Absolute Positioning!

My guess how they did it: Immense video data

1 year of non-stop video of all streets of a major city

CONCLUSIONS
